DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-16, drawn to a polynucleotide, classified in class 800, subclass
 296.
 - II. Claims 17-21, drawn to a polypeptide, classified in class 530, subclass 372.
 - III. Claim 22, drawn to a method of using the polynucleotide, classified in class 435, subclass 69.1.

For each of inventions I-III above, restriction to one of the following is also required under 35 USC 121. Therefore, election is required of one of inventions I-III and one of inventions (A)-(E).

- (A). SEQ ID No: 1 or a sequence encoding SEQ ID No: 2.
- (B). SEQ ID No: 5 or a sequence encoding SEQ ID No: 6.
- (C). SEQ ID No: 7 or a sequence encoding SEQ ID No: 8.
- (D). SEQ ID No: 9 or a sequence encoding SEQ ID No: 10.
- (E). SEQ ID No: 11 or a sequence encoding SEQ ID No: 12.

The inventions are distinct, each from the other because of the following reasons:

Inventions (A)-(E) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Application/Control Number: 10/004,502

Art Unit: 1638

the instant case the different inventions, represent structurally different polypeptides and the polynucleotides encoding them. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects.

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. The polynucleotide is structurally, chemically, biologically and functionally distinct from the polypeptide.
- 3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The method of using the polynucleotide does not require the polypeptide.
- 4. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product. The polynucleotide can be used for hybridization purposes.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, searches,

Application/Control Number: 10/004,502

Art Unit: 1638

and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong T. Bui whose telephone number is 703-305-1996. The examiner can normally be reached on 6:30 AM 4:00 PM; Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on 703-306-3218. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
